

PERFORMANCE IN MOTION

EXUSTAR is a leading supplier of bicycle, indoor cycling and motorcycle gear. It is our goal to provide a simpler, more convenient, comfortable and efficient riding experience. Since 2002 we've been committed to the development of new technologies and products, continuously innovating and improving. We place top priority on quality and safety, and all our products are thoroughly tested and, where appropriate, certified. In addition to our own Exustar brand, we work closely with other companies on an ODM or OEM basis, helping them to bring their products successfully to the global market.

20 YEARS OF PERFORMANCE IN MOTION 2002–2022

Exustar celebrates 20 years in the bicycle industry! We have come a long way since we started in 2002. Along the way we have faced challenges and overcome obstacles in this ever-changing industry. As we have grown, with each passing year our commitment to continuous improvement and innovation grows stronger. We thank our loyal customers for their continued support.

TIMELINE

2002

Exustar Co. Ltd. is established.

2003

Carbon fiber products developed.

2005

The Exustar Pedaling System (EPS) developed.

2006

Exustar enters the motorcycle market with a line of leather boots.

2007

Exustar wins top honors at the Innobike design competition. Titanium pedals begin production.

2009

A breakthrough in lightweight pedal design: 176 g/pr.

2010

Exustar sponsored rider (Hsiao Mei Yu) wins a gold medal at the Asian Games.

2011

Exustar cooperates with Garmin to develop the Vector pedal-based power meter.

2012

Company offers road pedals with different levels of binding tension.

2013

Exustar enters the US market. New state of the art pedal manufacturing facility opens in Taiwan.

2014

Development of a line of exceptionally strong and durable indoor pedals designed for the rigors of fitness centers.

2015

Exustar moves into a purpose-built facility in Taiwan with state of the art CNC-machining facilities.

2016

Exustar takes indoor cycling to a new level with the toughest, most durable and versatile pedals on the market and an indoor shoe designed for fitness centers.

2017

Exustar moves pedal manufacturing to its own production facility.

2018

The heavy-duty ISX Drive System is developed for indoor cycling.

2019

The Exustar motorcycle and bicycle marketing and sales teams merged into one unified unit.

2020

The company launches Triple Layer Cleat Technology, and a line of road pedals with transparent bodies.

2021

Exustar sponsored rider Eva Lechner competes at the Tokyo Olympics.

2022

Exustar celebrates 20 years in the bicycle industry.

BOOT TECHNOLOGY

Water Resistant

A membrane allows vapor to pass through but not liquid. Perspiration vapor readily leaves the skin, while water cannot enter. Keeps foot dry and comfortable.

Sliders

Replaceable, abrasion resistant sliders. Made from polyurethane; some models are available with an extra stainless steel plate.

REPLACEABLE BUCKLES

Easy to use adjustable buckles.

Rotary Microlock Closure

This closure provides the greatest degree of fit, comfort, and precision adjustment in motorcycle footwear. Comfort is literally dialled in, fine tuned by a small mechanical reel that controls a network of laces.

Shin Guard

Provides maximum shin impact protection. Ergonomic, comfortable, abrasion and tear resistant.

Ankle Pivoting System

A smooth floating pivoting system allows the foot to move easily, providing natural flexibility and comfort. Perfect for high speed performance.

Calf Protector

Provides maximum calf impact protection. Sculptured to help keep sand and debris out.

Heel Protector

Provides maximum heel impact protection.

Shift Plate

Anatomically shaped protection to prevent excess wear on top of boot.

Toe Cap

Replaceable protective steel toe cap.

Stylish, Steady, and Safety

1 SURFACE STRUCTURE

CORDURA® Classic Fabric

CORDURA® Classic fabric provides rugged durable performance for a variety of end uses, including packs, luggage, footwear and performance apparel. Products made with CORDURA® Classic fabrics feature enhanced tear and abrasion resistance, and long -lasting durability.

CORDURA® AFT Fabric

CORDURA® AFT (Air Flow Technology) fabric is a highly breathable collection of knit constructions with enhanced abrasion and tear strength. The CORDURA® AFT fabric collection has been expanded to include high tenacity polyester and nylon 6.6 fiber offering in a wide array of knits and 3D.

2 SCOPE OF APPLICATION

CORDURA® fabric is used by many global brands and militaries in the products that they make; everything from technical backpacks to day packs, safety footwear to athletic shoes and work clothing to outdoor active sportswear.
