

PERFORMANCE IN MOTION

EXUSTAR is a leading supplier of bicycle, indoor cycling and motorcycle gear. It is our goal to provide a simpler, more convenient, comfortable and efficient riding experience. Since 2002 we've been committed to the development of new technologies and products, continuously innovating and improving. We place top priority on quality and safety, and all our products are thoroughly tested and, where appropriate, certified. In addition to our own Exustar brand, we work closely with other companies on an ODM or OEM basis, helping them to bring their products successfully to the global market.

# EXUSTAR

## 2002

Exustar Co. Ltd. is established.

## 2003

Carbon fiber products developed.

## 2005

The Exustar Pedaling System (EPS) developed.

## 2006

Exustar enters the motorcycle market with a line of leather boots.

## 2007

Exustar wins top honors at the Innobike design competition. Titanium pedals begin production.

## 2009

A breakthrough in lightweight pedal design: 176 g/pr.

## 2010

Exustar sponsored rider (Hsiao Mei Yu) wins a gold medal at the Asian Games.

## 2011

Exustar cooperates with Garmin to develop the Vector pedal-based power meter.

## 2012

Company offers road pedals with different levels of binding tension.

## 2013

Exustar enters the US market. New state-of-the-art pedal manufacturing facility opens in Taiwan.

## 2014

Development of a line of exceptionally strong and durable indoor pedals—designed for the rigors of fitness centers.

## 2015

Exustar moves into a purpose-built facility in Taiwan with state-of-the-art CNC-machining facilities.

## 2016

Exustar takes indoor cycling to a new level with the toughest, most durable and versatile pedals on the market and an indoor shoe designed for fitness centers.

## 2017

Exustar moves pedal manufacturing to its own production facility.

## 2018

The heavy-duty ISX Drive System is developed for indoor cycling.

## 2019

The Exustar motorcycle and bicycle marketing and sales teams merged into one unified unit.

## 2020

The company launches Triple Layer Cleat Technology, and a line of road pedals with transparent bodies.

## 2021

Exustar-sponsored rider Eva Lechner competes at the Tokyo Olympics.

## 2022

Exustar celebrates 20 years in the bicycle industry.

## 2023

In the face of the pandemic and economic downturn, Exustar continues to push the boundaries of innovation as well as increasing its promotional drive.

## 2024

Exustar launches a long-term environmental sustainability program that includes the use of recycled plastic, and production of modular pedals.

# ICON GUIDE

# BOOT TECHNOLOGY

## Water Resistant

Our all-weather technology developed for motorcycle boot uppers is highly water resistant. An integral membrane allows vapor to pass through the upper but not liquid. In effect, perspiration vapor can exit the boot, but water cannot enter. Rain or shine, your feet will stay dry and comfortable.

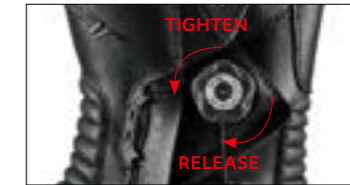

## Sliders

Abrasion resistant sliders protect your boots from damage. Made from polyurethane (some models are available with an extra stainless steel plate). Replaceable on some models.

## Replaceable Buckles

Easy to use adjustable buckles.

## Atop Rotary Microlock Closures

With Atop, boot fit is literally dialled in, fine-tuned by a micro-mechanical reel that controls the tightening and loosening of the lace. These rotary microlock closures provide the highest degree of precision adjustment, comfort, and quick release—there's nothing better in motorcycle footwear. Replaceable reels and laces.

## Shin Guards

Provide maximum shin impact protection. Ergonomic, comfortable, abrasion and tear resistant.

## Ankle Pivoting System

A smooth floating pivoting system allows the foot to move easily, providing natural flexibility and comfort. Perfect for high speed performance.

## Calf Protectors

Provide maximum calf impact protection.

## Heel Protectors

External plates that provide maximum heel impact protection.

## Gear Shift Pads

Ergonomically shaped, integrated protection to prevent excess wear on the top of the shoe when shifting gears.

## Toe Caps

Protective steel toe caps provide enhanced toe protection helping prevent toe injuries if a crash occurs or the bike is accidentally dropped. Replaceable.

**E-MIHC101**  
INNER FACE MASK

- Breathable
- Moisture wicking
- Easy to wash & quick-drying

Keeps your helmet clean, extending the life of its protective padding. It also makes your helmet easier to get on and off. An extended neck design provides extra coverage and protection, while a mesh nose cover ensures cooling airflow. Breathable, moisture wicking stretch fabric is comfortable on the skin, while flatlock seams ensure an unobtrusive fit and feel. Durable, easy to wash and quick-drying.

**Fabric** Nylon, Spandex, Polyester  
**Size** One size fits all.
